

EQUILBRANT LTD

CONSULTING ENGINEERS

“Established in 2009, Equibrant Ltd. Is an independent engineering consultancy offering clients a multi-disciplinary consultancy service, advising on all aspects of infrastructure and the built-environment with particular specialism in the Structural and Civil Engineering disciplines. We also offer a bespoke and specialist testing service to aid clients in Whole Life Costing Analysis and Infrastructure Asset Management.

Equibrant can provide a Project Management service, with the capability of compiling contract documents in accordance with NEC3 and overseeing the effective management of the administration of the contract.”
